## Weekly Journal

Date: 1/31/2020

Week 3

Clinical Location:

My clinical location for this week is in SBL, med-surg floor in 3 east. I followed my nurse Tulsa took care 5 patients who were postop. I gave them the scheduled medication as well as the PRN medication mostly for narcotics for pain management. I also assist with head to toe assessment charting for the nurse.

What you observed?

Nurse Andy was the charge nurse in the floor. He was very nice to assigned me with Tulsa. As a charge nurse he often came to Tulsa and asked about her progress. He also helped our patient to start IV insertion since both of us failed earlier.
