

Subjective

- I have pain in my legs and arms
- I feel very weak
- I feel really fatigued
- I am short of breath

Nursing Diagnosis/Outcomes

1. Acute pain due to the lack of oxygen to the tissues.
 - a. Get the patients pain level to decrease.
2. Fatigue with decreased exercise tolerance due to ischemia
 - a. Get the patients SaO2 to 95%.
3. Weight gain due to excessive intake of calories
 - a. The patient loses 1 to 2 pounds weekly.

Objective

- The patient has trouble catching his breath while walking
- The patients SaO2 drops under 90% while walking
- The patient has been gaining weight

Peripheral Artery Disease

Nursing Interventions

1. Give the patient NSAID's to relieve the acute pain.
2. Recommend an order of oxygen to the physician.
3. Limit the client's intake of calories per a day.
