Individual Performance Profile
RN Complications of Pregnancy Case Study Test

Individual Name: **BLAKE F SHAW**	Individual Score: **100.0%**
Student Number:	Practice Time: **0 min**
Institution: **Lakeview CON**	
Program Type: **BSN**	
Test Date: **3/11/2020**	
# of Questions: **5**	

Individual Performance in the Major Content Areas

Sub-Scale	# Items	Individual Score	Individual Score (% Correct)
			1 10 20 30 40 50 60 70 80 90 100
Regulation & Metabolism (Endocrine)	1	100.0%	▲
Reproduction & Sexuality (Reproductive)	3	100.0%	▲
Nutrition/Digestion/Elimination (Gastrointestinal)	1	100.0%	▲

Topics To Review

Outcomes

Nursing Process	No of Items	Individual Score	Description
RN Assessment	1	100.0%	The assessment step of the nursing process involves application of nursing knowledge to the collection, organization, validation and documentation of data about a client's health status. The nurse focuses on the client's response to a specific health problem including the client's health beliefs and practices. The nurse thinks critically to perform a comprehensive assessment of subjective and objective information. Nurses must have excellent communication and assessment skills in order to plan client care.
RN Analysis/Diagnosis	3	100.0%	The analysis step of the nursing process involves the nurse's ability to analyze assessment data to identify health problems/risks and a client's needs for health intervention. The nurse identifies patterns or trends, compares the data with expected standards or reference ranges and draws conclusions to direct nursing care. The nurse then frames nursing diagnoses in order to direct client care.
RN Evaluation	1	100.0%	The evaluation step of the nursing process involves the nurse's ability to evaluate a client's response to nursing interventions and to reach a nursing judgment regarding the extent to which the client has met the goals and outcomes. During this step the nurse will also assess client/staff understanding of instruction, the effectiveness of interventions, and identify the need for further intervention or the need to alter the plan.

Priority Setting	No of Items	Individual Score	Description
	1	100.0%	Ability to demonstrate nursing judgment in making decisions about priority responses to a client problem. Also includes establishing priorities regarding the sequence of care to be provided to multiple clients.

Thinking Skills	No of Items	Individual Score	Description
Foundational Thinking in Nursing	1	100.0%	Ability to recall and comprehend information and concepts foundational to quality nursing practice.
Clinical Judgment/Critical Thinking in Nursing	4	100.0%	Ability to use critical thinking skills (interpretation, analysis, evaluation, inference, and explanation) to make a clinical judgment regarding a posed clinical problem. Includes cognitive abilities of application and analysis.

NCLEX®	No of Items	Individual Score	Description
RN Health Promotion and Maintenance	2	100.0%	The nurse directs nursing care to promote prevention and detection of illness and support optimal health.
RN Physiological Adaptation	3	100.0%	The nurse manages and provides nursing care for clients with an acute, chronic or life threatening illness.

Clinical Areas	No of Items	Individual Score	Description
Maternal Newborn	5	100.0%	Ability to apply nursing knowledge to perinatal nursing care. Topics include antepartum, intrapartum, and postpartum nursing care as well as care of the newborn.

QSEN	No of Items	Individual Score	Description
Evidence Based Practice	5	100.0%	The use of current knowledge from research and other credible sources to make clinical judgments and provide client-centered care.

NLN Competency	No of Items	Individual Score	Description
Nursing Judgment	5	100.0%	Nursing judgment involves the use of critical thinking and decision making skills when making clinical judgments that promote safe, quality patient care.

BSN Essentials	No of Items	Individual Score	Description
Scholarship for Evidence-Based Practice	5	100.0%	The need for nurses to be able to understand the research process and base practice and clinical judgments upon fact-based evidence to enhance patient outcomes.
