

Module Report

Tutorial: The Leader

Module: Case 4

Individual Name: **Bibiana Schell**

Institution: **Lakeview CON**

Program Type: **BSN**

Time Use and Score			
	Date/Time	Time	Score
Case 4	4/5/2020 9:12:54 AM	2 hr 6 min	30%

Results by Stage		
Stage 1 (0 of 3 Correct)		
Question 1		
Selected Option/ Result	"Nurses who provide direct client care are an integral component of the quality process."	Result: Incorrect
Rationale	Nurses who provide direct client care have firsthand knowledge of quality issues; therefore, they are an integral component of the quality process.	
Question 2		
Selected Option/ Result	identify data collection methods.	Result: Incorrect
Rationale	Identifying data collection is one of the steps in the audit process, but it is not the next step after determining the topic to study.	
Question 3		
Selected Option/ Result	The frequency of rounds by the nursing staff prior to the fall.	Result: Incorrect
Rationale	A process evaluation measures the adequacy of nursing care.	
Stage 2 (1 of 3 Correct)		
Question 1		
Selected Option/ Result	Primary cesarean birth rates	Result: Correct

Rationale	Primary cesarean birth rates are not influenced by the quality of nursing care. Therefore, this is not a nursing-sensitive quality outcome.	
Question 2		
Selected Option/ Result	The American Hospital Association developed the Magnet Recognition Program.	Result: Incorrect
Rationale	The American Nurses' Credentialing Center established the Magnet Recognition Program.	
Question 3		
Selected Option/ Result	Decreased visual acuity	Result: Incorrect
Rationale	Decreased visual acuity is an intrinsic risk factor that increases as the age of the client increases.	
Stage 3 (1 of 2 Correct)		
Question 1		
Selected Option/ Result	Fourth quarter	Result: Correct
Rationale	The fall rate in the fourth quarter was 8.7 per 1,000 client days. This rate is the highest during the last fiscal year.	
Question 2		
Selected Option/ Result	The number of client falls during the previous fiscal year.	Result: Incorrect
Rationale	The number of client falls during the previous fiscal year is an inappropriate method to measure client falls because it can be influenced by client census.	
Stage 4 (1 of 2 Correct)		
Question 1		
Selected Option/ Result	Root cause analysis is a way to determine the origin of a problem.	Result: Correct
Rationale	Root cause analysis is a tool which nurses can use to analyze an adverse event to determine its cause.	
Question 2		
Selected Option/ Result	Identify possible causes of the increase in client falls.	Result: Incorrect
Rationale	Although the team should identify possible causes of the increase in client falls, this is not the first action the team should take.
