

Activity #1- What strategies would you use in leading a group of nurses

- The strategies that would I would use in leading a group of nurses is staff recognition, good communication, working together with the team to create a shared vision, along with empowering and inspiring them. I would also focus on increasing nurse satisfaction, improving patient outcomes, and providing a health work environment for both my team and the patients.

Activity #2 – What principles would you use to help empower clients to make decisions and be involved in their care.

- The client can be empowered through awareness, commitment, dreams, practice, and the journey. One of the biggest and easiest ways to help clients through this is support.
