

Individual Performance Profile

RN Adverse Reactions to Medications Case Study Test

Individual Name: ANA PUNSALAN	Individual Score: 100.0%
Student Number: PU2400643	Practice Time: 6 min
Institution: Lakeview CON	
Program Type: BSN	
Test Date: 4/16/2020	
# of Questions: 5	

Individual Performance in the Major Content Areas

Sub-Scale	# Items	Individual Score	Individual Score (% Correct)										
			1	10	20	30	40	50	60	70	80	90	100
Safety	1	100.0%											▲
Immunity (Immune System)	3	100.0%											▲
Critical thinking/Clinical reasoning/Clinical judgment	1	100.0%											▲

Topics To Review

Outcomes

Nursing Process	No of Items	Individual Score	Description
RN Assessment	1	100.0%	The assessment step of the nursing process involves application of nursing knowledge to the collection, organization, validation and documentation of data about a client's health status. The nurse focuses on the client's response to a specific health problem including the client's health beliefs and practices. The nurse thinks critically to perform a comprehensive assessment of subjective and objective information. Nurses must have excellent communication and assessment skills in order to plan client care.
RN Analysis/Diagnosis	1	100.0%	The analysis step of the nursing process involves the nurse's ability to analyze assessment data to identify health problems/risks and a client's needs for health intervention. The nurse identifies patterns or trends, compares the data with expected standards or reference ranges and draws conclusions to direct nursing care. The nurse then frames nursing diagnoses in order to direct client care.
RN Implementation/Therapeutic Nursing Intervention	3	100.0%	The implementation step of the nursing process involves the nurse's ability to apply nursing knowledge to implement interventions to assist a client to promote, maintain, or restore his health. The nurse uses problem-solving skills, clinical judgment, and critical thinking when using interpersonal and technical skills to provide client care. During this step the nurse will also delegate and supervise care and document the care and the client's response.

Thinking Skills	No of Items	Individual Score	Description
Clinical Judgment/Critical Thinking in Nursing	5	100.0%	Ability to use critical thinking skills (interpretation, analysis, evaluation, inference, and explanation) to make a clinical judgment regarding a posed clinical problem. Includes cognitive abilities of application and analysis.

NCLEX®	No of Items	Individual Score	Description
RN Management of Care	1	100.0%	The nurse coordinates, supervises and/or collaborates with members of the health care to provide an environment that is cost-effective and safe for clients.
RN Safety and Infection Control	2	100.0%	The nurse uses preventive safety measures to promote the health and well-being of clients, significant others, and members of the health care team.
RN Pharmacological and Parenteral Therapies	2	100.0%	The nurse administers, monitors and evaluates pharmacological and parenteral therapy.

Clinical Areas	No of Items	Individual Score	Description
Fundamentals	5	100.0%	Ability to apply fundamental nursing principles and skills to basic needs of clients. Topics include foundational client care concepts (ie: medical and surgical asepsis, infection control, physical assessment, therapeutic communication, medication administration, pain management integral to the delivery of safe, ethical, and legal nursing practice.

QSEN	No of Items	Individual Score	Description
Safety	5	100.0%	The minimization of risk factors that could cause injury or harm while promoting quality care and maintaining a secure environment for clients, self, and others.

NLN Competency	No of Items	Individual Score	Description
Nursing Judgment	5	100.0%	Nursing judgment involves the use of critical thinking and decision making skills when making clinical judgments that promote safe, quality patient care.

BSN Essentials	No of Items	Individual Score	Description
Baccalaureate Generalist Nursing Practice	5	100.0%	The need for nurses to be able to practice as a generalist using clinical reasoning to provide care to patients across the lifespan and healthcare continuum and to individuals, families, groups, communities, and populations.
