The screenshot shows the vSim for Nursing interface for a Maternity and Pediatrics case. On the left, patient information for Sabina Vasquez is displayed: Adm on 6/11/2020, Date of birth 3/3/2015, Age 5, Gender Female, and Diagnosis Asthma and pneumonia. Below this is a section titled 'Your main opportunities for improvement' with one item: 'You should have washed your hands as soon as you entered the room to maintain patient safety.' On the right, a 'Detailed view' of performance feedback is shown, listing 13 items with status indicators (green checkmarks for correct actions, red X for errors). The feedback items include: 'You introduced yourself.', 'You should have washed your hands as soon as you entered the room to maintain patient safety.', 'You identified the child.', 'You identified the relatives.', 'You attached the pulse oximeter.', 'You attached a 3-lead ECG.', 'You attached the automatic noninvasive blood pressure (NIBP) measurement cuff.', 'You assessed the pain level using the FACES scale.', 'You looked for normal breathing.', and 'You listened to the lungs of the child.' At the bottom, a score of 96% is displayed, along with a 'Retry' button and a 'Continue' button.
