Departmental Action Plan

Dealership **DARCY BUICK/GMC**

Academy Week **PARTS**

Class & I

Current Situation

Right now our parts department has an issue with the actual bin counts not matching. The problem seems to grow as the year goes on to the point where we have to do an inventory purge.

Overall Objective:

Our objective is to change our practices so that this purging process is done internally and not have to outsource it.

Proposed Timeline

We would like to try to measure our success over a three month timeline

Action Plan

The first step is to notify all the players involved their role in the process. Current

Requirements

1. Explain the benefit financially of handling this issue internally by pointing out the cost of an outside company.

2. Explain to all the parts employees their role. Each one will have a weekly schedule will be done weekly not once a year to attempt to nip the problem in the bud and all counts will be recorded on the log.

3. The entire department will work together in this not just one person. Each employee problem is detected all employees will meet to resolve and find the root of the problem. Was it stocked in but placed in the wrong bin? Each week the logs will be reviewed by the group. At the end of the month the logs will be compared to the dms report.

4. Every Monday parts meetings will occur at 8 am to review the logs and training. At the end of the month all employees will work together to compare the findings of the week. This will be done every month and at the end of the first three month trial a update will be provided.

5. There will be no cost to this. No new equipment will be needed simply a procedure change.

Projected Date of Completion:

august 2019

Sponsor Signature:

Nick darcy

Evaluation of Results: Include measured results. (± Metrics)

This should help save us the expense of paying an outside party to assist us. Also gross will increase from inventory to sell from.
