Departmental Action Plan

Dealership

Academy Week

Class & ...

Current Situation

Wholesale business in my dealership is low. Parts Manager feels that this is a barrier to grow the business. Currently we average 10%-17% Gross on existing wholesale. I want to be able to support parts and grow wholesale, but not if it's going to impact other areas of opportunity that we could be concentrating on if it proves that it actually increase profitability in the dealership.

Overall Objective:

To grow wholesale business profitability and increase departmental GP production. Currently we average \$20,000-\$30,000 in monthly wholesale sales. I would like to increase monthly sales to \$40,000 as a start, but to do it at closer to 20% gross. Achieving this objective will increase net profit by \$79,200 per year. Moving to 20% gross will generate an additional \$79,200 in yearly departmental net profit.

Proposed Timeline

Growing the wholesale business will take time. Perhaps 6 months - 1 year. To determine the current profitability of wholesale in our dealership. This will take place over the next 6 months. If weather or not the existing business is truly profitable, then we'll have a clear direction to concentrate our efforts elsewhere.

Action Plan

To assess and understand the profitability of our existing wholesale business, through the process of grading our existing wholesale customers. "Green light" on customers achieving the proper gross profit levels relative to the amount of business each customer generates. Perform a "Wholesale Profit Centering" Profits and Expense review. This information will provide the required insight to know if we are actually making money or not. Gross profit levels have been adjusted to reflect the types of customers we are working with.

Requirements
