Current Situation

Our current OBSO position is quite high at 12% of the current inventory sitting >5% of your total inventory aged over 12 months this is a problem that needs currently have another 12% of inventory sitting in the 7-12 month bracket that chance of selling in <9 mths is only approximately 15%. With a very green Par him the proper tools to learn how to not only address this situation but refrain

Overall Objective:

Our objective is to lower our obsolescence closer to guide between 5-7%. Current months. I would like to work to decrease that number to between \$30,000- \$35 guide. Achieving this objective will not only save us the loss of the inventory (profit by allowing room for us to stock what we sell.

Proposed Timeline

Changing the OBSO position can't be done in overnight, I propose a 6 month to the problem but also to implement the correct processes in the department to

Action Plan

To assess our current OBSO position we will need to look at the 3 biggest causes other processes are causing to it being higher as well.
1) Maintain A Special Order Parts Procedure
After investigating into our SPO process I realized we actually have a fairly good being it just isn't being followed. After speaking with the then Parts Manager he properly and that the staff was too new and he hadn't had the chance to train
