

Smart Goal Parts Week 1

Sam Cavett N364

We will increase our parts wholesale gross sales by 10% monthly by the end of October, 2020, by utilizing a tiered pricing system for vendors determined by their monthly purchase gross sales volume and also by implementing a strategic sales plan which includes a consistent market analysis for new account opportunities and an outward reaching door-to-door approach to establishing new sales accounts. Our progress will be measured by the monthly financial statement.
