

Subaru Release Authorization

A key strength of NADA 20 Group is its unique financial composite document. With 24/7 online access and more than 80 reports, the composite is a vital management tool in the dealership every day, not just during meetings.

All members benefit from the timely and accurate composite, which is pulled directly from your OEM financial statement and supplemental input sheet. Many NADA 20 Group dealers have their books closed and statement submitted within five days or less. Because the 20 Group meetings often occur mid-month, we require the statement and supplemental input sheet to be submitted as early as possible—but no later than the 10th of the month. We encourage you to take time now to review your process and ensure you can meet the submission requirements each month.

In the release form below, please provide contact information for the employee responsible for transmitting your monthly statement to the manufacturer. If any statement information is missing or appears incorrect, NADA will contact this person to ensure completion and accuracy.
