Agnes Wyman

Professor Garcia

English 101

May 1, 2020

1st Section of Final Exam:

Since writing a perfect essay requires concentration and commitment, I found it relevant to keep

training and engaging in debates to boost my expertise in writing. I find that writing is very challenging,

as I struggle to complete my assignments. I consider this to be a hard skill to learn but I have learn a lot

during my study in English 101. Even though paper writing has been a complex task for me, I really

enjoyed learning all the guides to written work.

My understanding and proper use of MLA, I deem it extremely detailed, especially with the

requirement for providing exact page numbers in the intext. MLA has enabled me to give credence to

the essence of research in modern life. Although, I am comfortable with other citations style, I can say, I

love using MLA.

The works cited page is another interesting facet that I have come to revel from, especially after

having challenges at the onset. Currently, I perfectly decode how to reference work, either intext or on

the works cited page. Primarily, I understand that the last name precedes the first name when making a

works cited page. It is always necessary to give credence to the author of the work, with the exact page

of the extraction.

Understanding the concept is also necessary in paper writing. Through understanding of the concept,

I believe, I can efficiently organize my essays. However, due to much academic work for me, I rarely

gave attention to custom essay writings. I wrote on an occasional basis, which makes it hard to perfect

my writing skills. As a result I am affected by difficulties in writing, which leads to production of well

written essays.

I want to gain confidence and consistently practice writing so as to improve my writing skills. I want to

have passion behind my work and offer outstanding work that competitively meet the demands of any

Agnes 2

course or class. In order for me to understand how to integrate sources and other ideas into my writing,

I have to continue to take courses offered in writing.

2nd Section of Final Exam:

Since sheltering -in place began I realized that stress can drive us to inappropriate responses. I

experiences restlessness and it caused me to become agitated. I had to talk to my self and asked me ,

what to do when you don't know what to do? The answer that came to me was pray. It was not easy

because people were just dying everywhere, my husband had death in his family, disciples of my church

and close friends died during this challenging and difficult time.

Things that, I think differently about now is that, I will stop making long term plans because nothing is

promised , not even the lifestyle we are use too. I realized that being with other people and breathing

the same air in an enclosed space can be risky. I will approach each day, being thankful and content in

what I have.

Some beliefs that I will change is that, I should always be in touch with my extended family; not only

engaged at special family functions, such as family reunions, wedding, birthday parties and or

barbecues. I believe that as a society, we had become so thoughtless until this pandemic showed me

how caring we really are. I don't like going to the doctor and taking medicine but after the effects of this

Coronavirus, if something feels different in my body, I will definitely go to the doctor.

I have changed in the way I have been eating. I am preparing healthier meals for my family and I am

eating healthier. I have been calling family members that I have not spoken to in years. Also I have

become more appreciative of the human struggles around me, and I have learned to relax, mediate, and

not worry about the things I cannot change, and live one day at a time.

I am surprised by my reactions since the quarantine began that I am much less intimidated to publicly

pray for my contacts. I can slow down and take a break. Everything doesn't need to be completed today.

I am surprised that, I have been able to encourage so many people who were worried and fearful.

Many people reached out to me including classmates of my high school graduating class.

Agnes 3

I enjoy spending time at home but I need my space and quite time. I love my family but I work too hard when they are around all day. I don't think the classes on line was a nightmare but I would have rather be in class with my classmates and hear my professor say," does that make since".
