### Elevator Talk

The core aspect of the vision is to bring people to closer relationship with God and to each other. The church has missed the mark regarding creating programs and church that is based upon teaching rather than relationship. Even because of Covid 19 we were able to see how relationship through meeting people is much more of importance.

I want to create a safe haven for people to talk about their depression, drug addiction, rape, abuse etc. that people are not willing to talk about it at church. It is going to be centered around bringing those people through Media such as filming, storytelling, skits, and editing. The missional aspect is to use these mediums to bring people to Christ. Through the online and offline meetings, we are going to bring about people to our organization where people are going to get real relationship that matters to people and the youth especially.

I am a youtuber currently and have been before Covid and also been doing Mixed Martial Arts for many years. I can help non-believers come to the atmosphere of a community that truly care about everyone that walks into the gym or studio to work together. The skills to get better at their craft will come later but the most important thing is that people who are believers and non-believers are going to work together as a community and meet people of God who truly are about them.

The most important element of all is relationship with God so it is going to be important to have a place of worship all the time. I would bring in musicians who can play worship songs and prayer leaders who can lead prayer for the mission that we are doing. Relationship with God is going to make a difference when relationship with people happens. Like any organization it is important that God is going to be the most important aspect of the organization.

The discipleship aspect is the next important aspect where people are going to be put into small groups of 2 or 3 to discuss issues and problems around the bible. The bible needs to be the center for learning and exchanging relationship. Through the training of about a year the person needs to bring another person to disciple.
