### The Punitive Expedition Of Yin from Shu Jing

1. Court Astrologers have been important to the court of the Chinese king because they played a significant part when the emperor considered important military actions. There is a lot of decision making that goes on and the astrologers are in that important role in that aspect. Hsi and Ho did a disservice to the emperor and got severe punishment for what they did. They violated their duties and left their offices and their post, the Emperor was not happy for what transpired with the two men.
2. Some cultural values that the document promotes is that they take their duties and honor very seriously, they have a strong passion for heaven bodies and do not like it when it is violated in a sense. In other words, they take their religion very seriously. They will take down anyone who is going against the religion and not doing what they are supposed to do. What people should believe in to make a kingdom run smoothly is by following orders of the kings/queens and doing what is necessary. Higher Ups should give some leeway for the people to not feel too controlled, having a good amount of laws and standards to keep people in check. Constant communication could be a key because their

are things being built and innovations that are going on that people need to talk with one another to stay up to date. These are things that people should believe in.
