**Vision Cast Outline:**

- 1) **Context:** Assistant Pastor leading Community Outreach ministry at RK, speaking to the RK Staff, Board and Volunteer Leaders.
  
- 2) **Intro/Sticky Phrase:**
  - a) Waiter trips with food, makes a mess. 3 reactions: Blame the waiter, Critique the System, Get on the floor and help clean up the mess.
    - i) **STICKY: It's time to clean up the mess.**
  
- 3) **Current Reality** is virtual school at home is a mess. Teachers, Schools, Parents and Kids are stressed out and on the brink. They need us to help clean up the mess, not sit back and critique.
  
- 4) **New Future:** Let's open our doors to the community and host parents, students, caregivers to use our WIFI and complete their school work in our building with our internet and laptops/tablets.
  
- 5) **Cost to get there:** Not much in terms of money, but it will take our staff and volunteers dedicating weekday hours to oversee and staff the Learning Center. The big risk here is the liability in opening our doors to the public. Yes it's risky, but I believe the call for our church is get on the floor and help clean up the mess.
  
- 6) **Compelling Call to Action:** Hempstead Elementary is just a few miles up the road and they have 90% students on free or reduced lunch (poverty level). They have many families that do not speak English or read English at home, therefore they are struggling greatly. The education gap between the haves and have nots is widening due to COVID. Education inequality is growing due to virtual school at home, things are a mess...**let's get on the floor and help clean up the mess.**
