Film and discussion

1. How was Islam different/the same from other Arab tribal religions? They were the same because they understood the oral relationship in which linked the tribes to written words and their knowledge of their ancestry and celebrated values older than memory. Poetry connected them also. They continued solidarity unity among the Arabs and Islam nations.
2. What were the early goals of Islam? The early goals of Islam was to pertain peace and share they knowledge of God and to share wealth and embody the notion of everyone as being the same, no one better than the next.
3. What led to splits/separations? The separation/splits happened because of the people who were the haves and have nots. Also the water wells that divide the country where people who had them felt they were better and did not share the water.
