### **Friendly Bags Should Popularize**

“Where can buy your friendly shopping bag? Your friendly shopping bag is interesting !” Maybe you will be asked from strangers. With the development of society, the use of plastic bags has greatly facilitated people’s shopping life, but the non-degradability of plastic bags has brought us serious pollution warnings. However, friendly shopping bags are environmentally and recyclable, it also can bring greater benefits to business. And they will be popularize.

Friendly bags are environmentally and recyclable ,it can replace plastic bags. As known as plastic bags provide convenience to consumers, they also came serious waste of energy and resources and environmental pollution due to excessive use an inadequate recycling. In particular ,ultra-thin plastic bags are easily damaged , and most of them are randomly discarded, becoming the main source of “white pollution”. However, the friendly bags can be made of materials that can be naturally degraded ,and the solution will not be too long . At the same time , it can be reused many time. With all this considered, it is clear that friendly bags are environmentally and recyclable.

Friendly bags can bring greater benefits to business. They are the general trend. Compared with plastic bags, the advantage of friendly bags is not only embodied in environmental protection, but is printing and the unique design can bring greater benefits to business. The color and pattern printed on the surface of friendly bags can be used as a good publicity to spread the market information of the company or product service to the world. When consumer are walking through the streets and lanes carrying shopping bags with branded product information, its is no less than making a publicity sign. The cost is not high and it is environmentally friendly. On the other hand, it can bring more business.

Through the above analysis and the market value and environmental protection effects , friendly bags is closer our life. They are environmentally and recyclable, it also can bring greater benefits to business. We should appeal people to use friendly bags for make contribution to the protection of the environment.
