Exposing the Black Lives Matters Movement

The Black Lives Matters movement could be a false narrative, and its ideals can be harmful to the mass population, especially African Americans. The goals of this movement are to make black people feel as though they are being victimized in society and hunted down by racists police. This kind of sinister deception keep black people minds captivated and spellbound at the same time. There is no common reasoning with them towards their ideologies, either you're with them or against them. They are anti-christian in all fazes and imaginations, they see Christianity as a religion that was constructed by the white man during the Jim Crow era to keep black people enslaved. They promote single parenthood as the new way of living , and demote the Christian family value of a father and a mother in a household setting. They also want America to free its self from this belief that heterosexual is the norm, and that the queer generation has debunked that as a myth. If it was up to myself, I would say this movement has the characteristics of a cult.

This movement promotes black people who have died at the hands of the police during a crime or have gotten injured during criminal activity. Now they put theses individuals

on a pedestal as our new civil right martyrs today. Take for instance a woman by the name of Breonna Taylor who had a court ordered warrant for drug trafficking with her , DOB, address and apartment number on the warrant. The police surveillance cameras observed her numerous times giving a package to her boyfriend at the time named Jamarcus Glover a known drug felon. The media caught wind of this incident and put out a false narrative that the police had the wrong address and had no reason to invade her apartment with a no knock warrant during the raid. Breonna Taylor died during the raid and her new boyfriend Kenneth Walker claims that the officers didn't knock announcing themselves as officers causing him to panic and shoot a warning shot hitting a officer in the leg as the officers returned fire, eventually killing Miss Taylor. The city of Kentucky gave her family a 12 million dollar settlement even before the officers were indicted, or convicted. The pressure of this movement has caused cities to give in to peer pressure, and gives this movement more ammunition to put pressure on local and federal government official to change the laws.

The BLM movement itself is expanding from state to state at a rapid pace, throughout our world. It's trying to tear down our democracy to conform to their ideology. It has gotten hold of our streets, social media, athletics, entertainments ,sporting arenas and especially the Democratic Party. Christians have also adopted this movement into their early morning Pastoral services, with some of our Pastors even making erroneous statements about how God is involved in this movement to get justice for African Americans in this world. What some Christians fail to realize, is that the Bible clearly states in 2 Corinthians 2:11KJV “ Lest Satan

should take advantage of us; for we are not ignorant of his devices". This movement clearly wants division, and force Fascism and Marxism into our society.

When I first heard of the Black Lives Matters movement, I thought it was about the uplifting of the African Americans race, but after further research, I found out, it was the total opposite. They call everything systemic racism, and uses it as a tool for support. They get their funding from white billionaires like George Sort and Rob Mckay. They want peoples to believe in their form of ideology to challenge the laws of our land. And if you disagree with them, they promote fear or separation. They want people to accept their ideologies and if you don't support them, you're out of touch with Society. Most of their concern are focus on defunding the police and ending the jail system. . They want black peoples to relive the past, and doesn't want them to grow from the past. The BLM movement calls our government racist, and want to blame all white people for the atrocities of slavery, and the condition of black people today. They say black people are the target of police brutality because, police have that same mentality as the ku klux klan, to control and eliminate black peoples. Because I'm black doesn't mean I have an American Express Card to disobey the laws of the land. We have bigger problem in the black communities than racism.

Criminals also love this movement called Black Lives Matters, because it has their support. And the reasons I say this is because, when I am watching television, and a Black Lives Matters protest is on, you see people, burning down properties, looting stores, assaulting citizens, cursing at law enforcement officers, and even murder. If i were a Criminal, I would be licking my chops concerning this movement. This movement makes great opportunists out of

criminals to blend in with people of color at the marches. Most of these marches are about black people who have been killed by police or who have die accidentally at the hands of police .

Criminal groups like ANTIFA and other black militant groups, are never ever called out by the leaders of the Black Lives Matters Movement, for violence at their rallies, because they relate theses criminal actions as reparations for black people during slavery. Supporting this movement in any form or fashion, is like, looking the other way when you see a crime being committed.

New York Post article on July 3, 2020 by Heather Mac Donald has explained how violent crime has plagued cities of color since these marches have taken placed. One crucial point she make in this article, is how officers are now told to hold back on enforcement the law, because it is considered racially oppressive to black peoples. This type of message put African American at more risk at being killed by their own kind, while political supporters stay silent regards to this. She also said that crime is rising up in the black communities like wildfires.

Does this sound like the police should be defunded? I feel like a hostage in my own neighborhood. The qualities of life is also going down in the neighborhoods, because people just don't care about whether or not they're going to be apprehended by the cops. I now see people using drugs on the street openly, drinking open container of alcohol, having sex openly and sleeping on the streets. Is this the kind of America we want to raise our black children in?

Our government needs to denounce this movement, and denounce it fast. They have also reached out to possible elected candidate Joe Biden on how they can be part of his transition team if he wins the election. They want to change America from a democracy to a marxism movement. They want our school curriculums to mandate that this movement is taught in every classroom , from kindergarten on up. They don't want our kids to think from their own ideas or

thoughts, they want to think for them. I just recently read an article in Burlington, Wisconsin news journal of how the black lives matters movement overthrew a school board meeting threatening physical violence towards teachers if they didn't add their programs in the classroom. They were so aggressive the police had to be called. They want as a mandatory systemic racism curriculum to be taught as a in the classroom to make black children to think and act as they do so that the movement can continue. They don't want our kids love our country and to observe patriotism but rather give allegiance them from freeing them from this country of oppression. They want to forced our children into a marxist ideology.

There is a video that resurfaces on the internet and on youtube where the founder of the Black lives Matter movement Patrisse Cullors states her groups are 'trained Marxists.' Their goal is take over America political system and change it into their system which they want the world to succumb too. It's about black liberation. Black Lives Matters has contribute a lot money to Joe Biden and Kamala Harris campaign this year and has sent a letter to them stating what they expect from them due to their support. They said without them and the help of the black community it would have been a different electoral outcome, so you have to make our movement a main stay in society.

In conclusion, just don't take my words as this movement being called sinister, but do your own due diligences on it. I have read several different articles and have seen several different videos on how the Black Lives Matters movement camouflages it self to make it seem like it is getting justice for black people and the conclusion that I have come up with is that it's

destroying our black communities from having the quality of life that we deserve. How can we live in a black community where the police are defunded and our children can't play in the playgrounds without being subjected to gang violence and drive by shooting. Is this what we pay taxes for? Black Lives Matters isn't going to protect the old lady who gets mugged on the streets or the woman who gets raped, it's the police officer that goes out there everyday putting their lives on the line to keep black people safe. One of Black Lives Matters famous chants at their rallies are "What do we want, dead Cops." Is this the kind of movement that's good for America or Black people? God forbid if the United States cave into this movement and allow it to fester into our society and become a major platform. I guarantee in a matter of years this movement will disintegrate our country.
