

You should be known

In this era of rapid change, science and technology are becoming more and more advanced, and various advanced designs are emerging in endlessly. Of course, the most successful invention is the mobile phone. We can see the traces of mobile phones from almost every corner, which shows that mobile phones have become a part of everyone's daily life. Although mobile phones have brought us many benefits, it also brings disadvantages.

Mobile phone is negative influence in students. For example, some students have not slept in the early morning due to playing mobile games for a long time. The next day, I felt very tired and dozed off in class. Since then, my grades have plummeted. In addition, some students are also unknowingly influenced by these cultures because they use their mobile phones to watch some pornographic websites

The most serious disadvantage brought to us by mobile phones is the people with bowed heads that we can see everywhere. Even when everyone gathers for a meal, we still see everyone pressing their phones with their heads down. This phenomenon makes everyone lack of communication, leading to more and more estranged relationships, and also making our social skills worse and worse. All in all, mobile phones were invented by humans, so we should use mobile phones properly instead of being controlled by mobile phones to control our lives.

in a word, mobile phones are invented by human beings, so we should use them properly instead of being controlled by them in our lives
