Spiritual growth plan

11/28/2020

I want to thank Jesus Christ for setting up his purpose on me, as a young man my life is full of aspirations and hope for the future. I have been working so hard since I was in middle school. I have learned that everything that we put in Jesus hands result successfully. I am looking forward to being more engaged with people with aspirations as me, making strong relationships with them to have the best academic experience ever. This is how I plan to grow up emotionally. It will be very easy for me to apply this in my life because I am very sociable with anyone it doesn't matter who or where. I have learned something really important from my academic experience, the more positive people I get involved with, the more chance I have to succeed. I can tell that thanks to this I have accomplished so many things through my academic experiences. In terms of socially is basically the same that I said before, I will find people who motivate me to continue growing academically and spiritually. And I know for sure that Nyack College is the perfect place to find those types of people. The great thing about this college is that I can find people from different parts of the world, and this is amazing because we can learn and discover new things from each other. I think this will be a great way to grow up socially. I really thank God for this opportunity at Nyack, this will be the perfect place for me.

How will I grow up spiritually and intellectually? I have so many things in mind, between them I plan to become a worshiper of God in one way that I can teach the

word of God and learn from what I teach. I am looking forward to being more open to God to know more about God, strengthen my relationship with Him, and meet new people which love God. I want to mention that my dream of becoming a police officer is a purpose of God in my life, this what I feel God wants me to do in life, and I am open to receive His purpose in my life. I am looking forward to continuing doing community service for people who need it, because I want to serve God, I want to serve people. In terms of intellectuality I plan to work harder than ever before, thanks to my hard work and my dedication I am at the level that I am today. I thank God for making me a hard worker who never gives up, even though sometimes I feel weak, I just get up and keep moving forward because nothing can stop the purpose of God in my life. I believe that God will hold me accountable in these areas of my life, also my hard work and aspirations for the future will keep me on course in my journal through college. For my intellectual development I plan to always be critical thinking to myself, I must recognize when something is not working, so I can change it. As **Elon musk** once said “*people work better when they know what their goals are and why*” this means a lot to me and it is something that I apply to my life everyday, I work better when I know what my destination is and why.
