

## APA YouTube Tutorials

As a social science discipline, the social work profession uses the *American Psychological Association* (APA) format, 7th edition, for writing academic papers. We know that some of you will be familiar with APA style, since you may have used it in your undergraduate work. For others, it may be a new writing style. Here are several video tutorials on how to write in APA format. You will be expected to use this format for most of the assignments you will be asked to complete as part of the MSW program. In addition, you may seek out the services of *Nyack's Writing Center* for assistance with APA format and other writing needs.

APA Formatting - The Basics (4mins 47secs)
