CHAPTER 1

“THE ROLE OF THE STUDENT PRESS”

The Role of the students press, on the colleges around the world people see the news that always go around so quickly and, in this chapter, we see the history of Michael Newsom, the campus news editor for The Daily Mississippian, when you got a news and its early in the morning and you still asleep at the moment you can maybe don't have a reaction or you can just ignore it but when you started to think you can have a different reaction and got many emotions at the moment.

The life of a journalist can be really different as us and, in this Chapter, Michael Newsom is a really big example of that, you can just wake up for a normal day and you got a new about a house that is in fire and three persons has died and later that day you have to share the news in the newspaper.

The newspaper is really necessary and important for us because if something happens around the city the newspaper is having the information for you on time.

With the news about the House on fire and everything that happened in this chapter people used to see more of the newspaper because they were looking for an answer.

The Daily Mississippian were so focused on this tragedy and followed the fire department and were looking for an answer. People follow all this case so much not just because the drama otherwise for the tragedy, after almost 6 months after all this case finish and people knew about how does that happened and how it was, the newspaper had like a stop with all the share the information in this case and people stopped to have like the obsession with the newspaper , as I can see in this part of the chapter is the news always have to be really focused on what is happening in this case with the house in Fire.

Newspaper is really more than a hobby during Colleges Degree can be taken as the beginning of their career because in that moment if you share something really powerful you can impulse your career and people would start to know and what you do, “This training role is even more important today as the field of journalism undergoes cataclysmic changes.” Rachele Kanigel. “The Student Newspaper Survival Guide.” Apple Books.

When I read this part of the chapter I understood and that made me think and realize a lot. Many times, people in the field of Journalism have up and down and you can never have the up all the time you may need complete perfect profile, now the industry is getting so much bigger and there is so many new Journalism and it's getting so much

better because now this field is getting so much attention and they need more.

Now in time with the social media and all those new ways of communications the online newspapers are growing so much and now there are so many places where you can see Journalism from any part of the world doing incredible jobs, social media is giving opportunities to anyone who just has the desire to do something like this.

Being a Journalist is not something really easy. You need to have so much patience and make sure you can deal with all the things that can come to you when you start it.

When we talk about Journalism we think it is something not a big deal or just something for fun but we really don't know how much time it takes to do a post and to prepare the project you got, Just during a little amount of time.

Now in time with all this apps and portals we can express and see our part of a journalist because for now you don't need to have so much paperwork and with this book and in this chapter we can learn and see more about this career, and during the time we are learning we can also practice and with this book i feel we can also put in practice everything we see on here.

We have the chance for start to learn and practice and we should put in practice all not just see it and leave it because this world of the Journalism is not something easy and it contains many things but if we have the chance to do more we i feel and think we can learn for this person how know many things.
