Journal week 5
Start time 9:40
End time: 9:56
October11, 2021**

**Week 5
My salvation experience**

talking about a plan after graduation I think it will be confusing because currently I have many plans, many ideas And many things that I want to do but actually I think I will graduate an initial plan would be to build my own company always wanted to be an owner but not be an employee Currently I am an employee I need the income to be able to study and support myself but I know that once I graduated my plans will be to be owners I have always dreamed of my own advertising company to represent big brands and take care of their advertising take care of promotional model products and that to them work catches their attention, this has always been a dream for me but nevertheless I know that it is not easy and for that reason I am always working I will be able to achieve it that is something that I am passionate about and I know that it will give me the opportunity to fulfill my Another dream that is to be able to travel around the world by having the possibility of working with several companies, I will also be able to To travel, get to know different countries, their cultures, and learn more about all the places I visit, advertising is not easy, but it is something I like, I know that it takes a lot of

work and time to set up in the company, it is not achieved at night in the morning but nevertheless I know that little by little I will achieve it because since I am already working on it in my career, which is communication, I am learning in different ways to talk about different topics either through journalism, arts, among others. I am currently working on those dreams because I know that at the moment everything has to start to make sense but for this I have to work from there on that and for that reason it is important to have my plans and goals fear that time passes I could learn that Everything I am seeing and learning today is going to work for that plan and that is what I have a future to be able to use the day I am in charge of what I want to do. I am in charge of sponsoring and teaching different products. have companies around the world travel and get to know different cultures through my work I know that I will be able to achieve several different things which I do not think about right now but I know that I will be able to achieve it once I am where I want to be, not everything is achieved overnight. In the morning but little by little things are achieved, but from now on I must work on that since if not I will not be able to achieve it I must do my part. that is possible
