Free writing for 10 minutes-“GMO’s”

In this free write for ten minutes, I want to learn more about genetically modified organisms (GMOs). I think that a helpful source in my progress to learning more about GMOs is an eBook called “GMOs, Consumerism and the Global Politics of Biotechnology : Rethinking Food, Bodies and Identities in Africa's 21st Century” by Munyaradzi Mawere and Artwell Nhemachena. This book speaks of health crises that many parts of the world like America or Africa are faced with. I think that GMOs are cheaper than foods that are whole grain or natural. Though, I grew up with many siblings and with food banks that were easily accessible in our state of poverty; these food banks were not stuffed with whole grain but foods to live on. I understand that eating healthy would cost more, I just think that the government does have a hand in serving or advertising unhealthy foods. I am not declaring that it is the fault of governments why people face common illnesses, I think people have a responsibility for what they consume. I just think that there are some truths that are not always emphasized but, left to be willfully researched by individuals with interest.
