

(34)

A. Sample size = 400

B. % of persons who commute less than 30 mins
 $= 228/400 = 57\%$

C. Cumulative relative frequency of fourth class
 $= 293/400 = 0.7325$

D. % of persons who commute for 40 mins or more
 $= 100\% - \% \text{ who commutes less than 40 mins}$
 $= 100\% - (293/400) \times 100$
 $= 100\% - 73.25\%$
 $= 26.75\%$

E. % of person who commute less than 50 minutes
 $= 348/400 = 87\%$

F. Number of persons who commute for 20 mins or more
 $= 400 - 158 = 242$
