

Psychopathology Quiz #2
Chapter 2: Models
Chapter 3: Clinical Assessment

Short Answer Essays: This assignment should be at least one paragraph per answer.

1. Describe the origins of abnormality according to any three of the following models of abnormality: biological, psychodynamic, behavioral, cognitive, humanistic-existential, sociocultural.
2. Explain the bio-psycho-social-spiritual approach to understanding the causes of abnormality.
3. Using depression, provide an example of how the bio-psycho-social-spiritual might be applied to the possible causes of depression. Give examples of each of the four categories that might contribute to depression.
4. Name two weaknesses in assessment. Give examples of each of the two weaknesses? What can be done to address these weaknesses? Be sure to address reliability, validity, and bias issues.
