What was the most helpful aspect to me? It is very difficult to say just one thing. To be honest, I did not wanna take this class. I thought it would be just too much work. There is a lot to do to be honest! But I love every single work. I wish I have more time to focus and really think through how to write. I wanna say definitely writing skills in certain type of form. I don't get many opportunities for formal writing. I write journals and my Q.T but these are freewriting. Therefore, it helps me to use more formal English. This class reminded me how fun writing is!

There is nothing that I feel like isn't helping. If I have to say one thing, that is grammar. Only because I've taken so many English grammar classes even though I still have to work a lot on my grammar. Since English is my second language, I've been learning grammar since when I was in elementary school. As I am writing this, ironically, I had such a difficult time with subject-verb agreement. I got almost everything wrong. I was so shocked. I still don't understand. I wonder if this is something I need to understand or more likely memorize the words.

In conclusion, every single part of this class is very helpful for me. I only wish I could write as I am thinking in Korean. I would definitely enjoy it even more. But this is very useless, I think. I hope at the end of the class, I enjoy more writing in English and very naturally write in MLA style as well!
