

To be honest,the first part was a little weird,she seems like a imagination girl,and she got a really strange relationship with her mom.There is no coherence in the whole story ,when I read to second part , I thought it a narrative style novel which is about she's life with her mom, but in the fourth and fifth part ,it's like a science fiction,her father was a robot who was not human,and I don't really understand what is she trying to say.But I got that she was raised in a complicated family,her parents got divorced,and she seems like hated her father,but her mom didn't feel like the same way .Actually ,I want to read on ,because I am a big fan of science fiction,I really want to know what happened after she found her father and what does he want.
