Time Finish: 9:11

I will share my journey here in USA, I came here as a tourist visa that was 2018 and my intension was just to visit only as I have two way ticket and no plan to stay longer, but one of my friends asked me to stay as I'm here already and try to find a job as a lot of opportunities here or might be I will find the right man for me and ask me to marry him, I was doubt at that time but since I don't want to be undocumented, I researched and asked with friends of friends of friends how to change the status from tourist visa to student visa until I met one of the Pastors of the church in Queens. when he heard my story, he told me that I have the same situation of his niece, but his niece applied a F1 visa(student) and she became successful and gave me an inspiration and motivation. That time I prayed to God and lift it to him, that if this is really for me and this is what he wants I will stay. I applied for student visa and It was so quick for only 4 months that time my F1 visa was approved, God didn't gave me any problems when it comes to all the requirements, until I realized that It's useless because I couldn't save, for 3 years I stayed to that school,(English Language) all my earnings are only for my tuition fees and It was frustrating, until I met a friend again and told me to transfer to Nyack College which Alliance University now and take a Bachelor's Degree, which I followed her advised and again God is so good all the time at the moment that I processed my documents, it was so smooth and no other problems even though I was late for all my subjects and felt being frustrated I was overwhelmed and I didn't know if I can make it or finished the semester but God is so good all the time, I finished my First Semester and now I am continuing student major in Information Technology. I am so happy and blessed as God is always there for me. Always trust to the lord and believe in him. Thanks be to God. Amen.
