Topic: The impact of teachers' motivation on ELL students' academic performance.

This topic was selected out of interest in the teachers' capacity to motivate ELL pupils to put in a lot of effort and succeed. This topic is vital because it highlights how crucial it is to have a motivated teacher in the ELL classroom. We'll mainly focus on how teachers' enthusiasm stimulates ELL students to participate in class, encourages them to engage in conversation, and involves them in both individual and group work. predicated on the belief that people require the inspiration to get engaged or devoted to the learning process through acquiring ideas, skills, and concepts for general development.
