

## Video Reflection

Carlos Gomez.

When it comes to world views there are hundreds of religions and all of them have different beliefs, perspectives, and even different perspectives of God. Today, we have many different religions in the world, and these are created by different beliefs. The different religions in the world mean different perspectives from the Christians. From this video, I learned that among all these religions there are only 7 basic major religions which are, Theism, Judaism, Christianity, Islam, and Deism. These differences play a significant role in the world because they help their member to have different beliefs, but most importantly to have a different worldview of religion. For example, a Deism believer states that there is a God behind the world but He can't do miracles. However, something new and interesting for me was the theistic belief, God in all and all in God. I related this part of the video to some personal beliefs because I believe that God is in all, and all are made through Him. I believe that it is extremely important to know this information because as Christians

we must know and understand how does the religion look like from different perspective and beliefs.

This video tells a big difference in contrast to the worldview I hold. For example, the catholic church believes that there is only one God in the whole universe Who controls the world. However, these religions stated in the video shows a completely different view of the God we all know. For example, atheists believe that there is no God at all. However, this is such an extremely false belief because we who follow Jesus know exactly that there is a real God. We are witnesses and can testify to His divine presence in our lives. This video also teaches us that different religions create divisions between people, However, God has called us to come together as one.
