Brain Storming Station

Gonna use python and a database to make an interactive web page and make a Graphic User Interface

Coding includes: Import

- Global variables

- Database

- Local variables

- Functions

- If statement

- For or While loop

- Class

- Method

- Input

- Program works fully utilizing all of the above

- WORLD CUP WEBSITE
  - **Stats**
    - Teams
    - Players
  - **Fixtures**
    - Past
    - Present
  - **News**
    - Injury
    - Drama

  - **Visually**
    - Interactive
    - Image input
    - Sound input
  - **Quiz**
    - Present question Quiz
    - Past question Quiz

Code Walkthrough Flow Chart: code runs, then the user will be met with visually appealing interactive webpage, that leads to information or entertainment of the world cup
