

## Field Experience Responsibilities Summary:

Summarize understanding of field experience expectations for this course in one or two paragraphs. Emphasize your responsibilities.

Field Experience Responsibilities has a variety of different topics to talk about. This includes Alliance's field experience philosophy, guidelines, classroom activities, and values/ conduct/ dress. Alliance has three components in their field experience philosophy in responsibilities. This includes diversity, application, and service. Candidates are to interact with an all-inclusive student body. Secondly, specific coursework is to have the intent of theory will become application. Thirdly, at a Christian University, the candidate needs always to provide an attitude of service towards the collaborating teacher and the students.

The guidelines in the handbook help guide the teacher candidate, the college liaison, the collaborating teacher, and the school principal. This guideline provides help in organizing what each needs to do and provides collaboration with one another. One of my favorite guidelines is to send in detail a thank you to the collaborating teacher at the end of the log hours. Classroom activities suggest and encourage the teacher candidate to observe the classroom environment, the collaborating teacher's instructions, and asking questions about the collaborating teacher's responsibilities. Lastly, Alliance's values, conduct, and dress include a variety of ways to maintain best practices for the teacher candidate, acting as an ambassador for Alliance.
