### Medical Case 2: Jennifer Hoffman

#### Documentation Assignments

1. Document your initial focused respiratory assessment of Jennifer Hoffman.

Answer- My initial Focus assessment, Pt was experiencing dyspnea, auscultate lungs showed revealed bilateral wheezing. Oxygen 10 liter of via Nonrebreather. Elevated the Head of the bed to it can help improve breathing and lung expansion. Confirmed pt and medication 4 mg of Ipratropium/fenoterol, and order methylprednisolone just been administered.

2. Identify and document key nursing diagnoses for Jennifer Hoffman.

Nursing diagnoses: Ineffective airway clearance secondary to Asthma Attack.

3. Document your phone call to the provider, including the information you provided regarding the significant changes in Jennifer Hoffman.

Answer: Hello Doctor P Good afternoon, so our pt. Ms. Hoffman, O2 saturated is 98% percent on 10L of Nonrebreather, Administered the medication as per ordered, Vitals are stable, except pt. Heart rate 124. Pt stated she feels much better now. Will continue to monitor pt.

4. Referring to your feedback log, document the nursing care you provided.

Answer – Performed a focused assessment on the pt. respiratory system. Placed pt. on a nonrebreather 10L, administered medications as per ordered/MAR, Auscultated pt. lung reveal wheezing bilaterally, equal chest expansion. Attached a pulse oximeter and continuous ECG to monitor pt. Attached automatic NBP to monitor Bp, Took temperature, HR, and RR. Assess pt. IV no redness swelling, infiltration, bleeding, or drainage. Provided pt. education.
