Reading Leadership Questions Week 3

1. What are some of the barriers that hinder PCCP Recovery?
2. How can social workers use the PCCP approach with clients who are experiencing dementia?
3. Think about your current role in SW. Do you find that you use traditional language when creating client learning assessments, and if so, after reading the PCCP article, has it prompted you to change your style of writing practice? If yes or no, share your answer.
4. Share how person-centered care planning impacted your learning this week.
