Enlightenment

The most important take aways of the Enlightenment is that one, other social orders were not as class conscious as most European societies and that it was accredited to that of people learning human kindness such as honesty, debatable behavior, and furthermore, that eradicating change was everywhere not just for elites but for all and for all to think for themselves. Enlightenment was life-changing and they were probing for worldly explanations ,therefore, how they thought through Enlightenment that they could better the lives of humanity. I believe that Enlightenment fundamentals continue to impact human societies today by taking the power away from the kings and queens and give the ordinary people a fair chance in life.
