

Fabienne Regis

Professor Greaves

Introduction to Communications

1. There are some people that I can't hear due to my expectations of them like one of my siblings. When we talk I tend to cut off or talk over due to me knowing the excuse or knowing the reason why. I've had to learn over the years that I have to sit and listen to the full story or example, Before I put in my own conclusion or jump the gun
2. I would pick my dad as my ethical guide. What would dad do?. My ethical principles I received from my dad are honesty and loyalty
3. She chose not to listen to what the student said and wasn't relevant to prove her point. She wasn't listening to respond.
4. She took initiative and told her the right thing to do as the professor is doing for the student.
