

Fabienne Regis

Professor Greaves

Introduction to Communications

1. Jim's dad believes he doesn't get good grades because of him going out with his friends he believes he doesn't get good grades because he's not as smart as his dad.
2. To test if what gym is saying is true I would ask him to take a test where he studies his hardest for and see how he does to see if his attributions are true. Question I could ask him is how well do you do it if you study your hardest.
3. Since college was much easier back then and there was less to learn because technology wasn't as advanced it's harder for him to obtain all the knowledge.
4. I think Jim should study his hardest for his parents and for himself and I think his parents should let him have some breathing room and maybe learn from his mistakes the hard way.
