

Good Day Rep. Gregory Meeks,

I would first like to thank you for the consistent, committed, and faithful work you and your team have been doing for our community and its people.

The work you do for undocumented immigrants from Haiti and Venezuela is not unnoticed by 1st and 2nd generation immigrants like myself.

Also, although I do not support abortions, but rather adoption and financial, housing, education, and etc support for mother's not seeking not to prolong or seek motherhood; I do love and value your intense legislation and push for women's rights of their body.

With all that said Mr. Meeks I would like to see you and your office petition and seek legislation to lower the rent rates in New York City. The rent within the five boroughs of New York City is outrageous, especially with inflation, recovery from a Pandemic, job layoffs, mental illness, etc.

Mr. Meeks, what frustrates myself and a lot of your constituents is that our nation has billions of dollars to sent monthly to Ukraine, Palestine, Israel, and many other countries, but we cannot facilitate and/or construct a plan that would allow our rent rates in New York City to be affordable and I dare say with humility "humane" for the average resident.

With your political influence and wisdom, it is my deepest desire and hope that you can rally support, allies, and enough legislation for a Bill to put a hold on any rent increase and possibly lower the current rates.

Thank you for your time and be Blessed.

Regards,

Delon Chester.
