

Bernadette Davis
World Civilization II
March 22,2023

Three things I have learned from this film:

- The disease Influenza killed more people than the war, that was 3 times war.
- Alcohol played an important role in the war. Soldiers would drink alcohol before battling in the war.
- I always thought that World War I was fully a European war. The United States had no involvement in it, but they was part of this war later towards the end
