

Frances Cotto-Jones

Week 1 Part A

The main hypothesis of my thesis is there is a relationship between laissez-faire leadership and employee flourishing. The dependent variable is flourishing. The scale I will use to measure this scale in the Mental Health Continuum Short Form. The independent variable is Laissez-faire leadership which will be measured by the Multifactor Leadership Questionnaire. In order to collect this data, I am looking to email the surveys through the company I am currently employed with. My level of analysis is individual.
