

Rachel Negrón

Four Take-aways

1. I learned that there was a 35-foot pillar in Delhi that dates back to 400 AD centuries.
2. Forge welding is when you take lumps of iron about 20 kilograms in weight then place them on top of each other in a hot condition, then hit with a hammer.
3. Robert was an Indian astronomer and came up with the concept of pi.
4. They believed that the Earth's true circumference was 24,900 miles
