EVALUATING THE EFFECTIVENESS OF THE IMPLEMENTATION OF RELIGION IN
TREATMENT OF ABNORMAL PSYCHOLOGY DISORDERS: A LITERATURE REVIEW

Michel Adams-Miller

Alliance University

Abstract

According to Engin Gectan(2019), Mankind has tried to research, understand and know the world and the universe he has lived in every period of history, but as a result of all these efforts, the topic that he has had the least knowledge on was again about himself. The constant changes emerging and influencing societal norms have played a major role in the inability of theorists to accurately define abnormal psychology, thus creating challenges in determining effective treatment options. The potential of viewing religion as a mediator between normal and abnormal increases the capacity for greater impact on the treatment of abnormal disorders. Normalcy, when disrupted denotes the absence of order, hope is a vital attribute that contributes to restoring alignment.

[The body of your paper uses a half-inch first line indent and is double-spaced. APA style provides for up to five heading levels, shown in the paragraphs that follow. Note that the word Introduction should not be used as an initial heading, as it's assumed that your paper begins with an introduction.]

[Heading 1]

[The first two heading levels get their own paragraph, as shown here. Headings 3, 4, and 5 are run-in headings used at the beginning of the paragraph.]

[Heading 2]¹

[To add a table of contents (TOC), apply the appropriate heading style to just the heading text at the start of a paragraph and it will show up in your TOC. To do this, select the text for your heading. Then, on the Home tab, in the Styles gallery, click the style you need.]

[Heading 3].

[Include a period at the end of a run-in heading. Note that you can include consecutive paragraphs with their own headings, where appropriate.]

[Heading 4].

[When using headings, don't skip levels. If you need a heading 3, 4, or 5 with no text following it before the next heading, just add a period at the end of the heading and then start a new paragraph for the subheading and its text.] (Last Name, Year)

[Heading 5].

[Like all sections of your paper, references start on their own page. The references page that follows is created using the Citations & Bibliography feature, available on the References tab. This feature includes a style option that formats your references for APA 6th Edition. You can also use this feature to add in-text citations that are linked to your source, such as those shown at the end of this paragraph and the preceding paragraph. To customize a citation, right-click it and then click Edit Citation.] (Last Name, Year)

Footnotes

¹[Add footnotes, if any, on their own page following references. For APA formatting requirements, it's easy to just type your own footnote references and notes. To format a footnote reference, select the number and then, on the Home tab, in the Styles gallery, click Footnote Reference. The body of a footnote, such as this example, uses the Normal text style. (Note: If you delete this sample footnote, don't forget to delete its in-text reference as well. That's at the end of the sample Heading 2 paragraph on the first page of body content in this template.)]

Start a new page for each table, include a table number and table title for each, as shown on this page. All explanatory text appears in a table note that follows the table, such as this one. Use the Table/Figure style, available on the Home tab, in the Styles gallery, to get the spacing between table and note. Tables in APA format can use single or 1.5 line spacing. Include a heading for every row and column, even if the content seems obvious. A default table style has been setup for this template that fits APA guidelines. To insert a table, on the Insert tab, click Table.]
