Professor O'Hara

World civilization I

after watching the film, the things that I discovered are.

Linde's plurality. India is said to be a pluralistic and tolerant country where Buddhism flourished along with the Hindu religions. I knew they practiced Buddhism but I far from knowing that they were pluralistic. I also learned that the Gupta period was a period when Indian civilization took the next big step (towards the future)

the Indians are the masters in the mastery of iron (the metal) I thought they were more gold because of all that I probably saw in the films. but no, they are the masters of iron and used forge welding, something that is impressive.

I also knew that the Indians are good in Mathematics and in commerce but was very far from knowing that they developed in several fields including the literature of high culture and especially in science. they show that the ancient Hindus were brilliant mathematicians and that the Gupta scientists were the pioneers of the use of the number Zero as the foundation of all modern mathematics.

interesting and which I did not know is that it was an astronaut Gupter who proved that the earth revolved around the sun 5000 years after J.C Aria belle was his name. I can assure you that my primary school teacher never told me this truth. He is also the one who created the concept of five and he is also the one who came up with the estimate of the circumference of the earth during this time, but which is very close to that which we have today at 24,900 miles

I ended up understanding that there was a lot of intellectual speculation going on in India because the West was traumatized by the revelation of the infinite universe and the place of man in his time that the era of India
