

The following are four things I learned from the film about the Gupta Empire.

1. It was formed in the 5th Century AD after the fall of the Roman Empire.
2. I learned that it was home and tolerant to multiple religions, including Buddhism and the Hindu religions.
3. It developed iron technology centuries before the Chinese did and 1500 years before the Industrial Revolution.
4. It was an astronomer from the Gupta Empire who first proved that the Earth went around this sun, in roughly 500 AD.
