

## **Research Assignment week 10: Incan Empire**

If the Incan Empire had continued to expand for another hundred years, it is possible that the Spanish invasion could have been prevented. This would have given the Incan Empire more time to strengthen its society and develop successful networks and hierarchies.

One of the factors that would have needed to be strengthened to secure the empire from European takeover would have been its military. The Incan Empire was known for its strong military and had successfully defended its borders against neighboring tribes for centuries. However, as the empire grew larger, it became more difficult to defend. If the empire had continued to expand, it is likely that the military would have needed to be restructured and strengthened.

Another important factor would have been the development of trade networks. The Incan Empire had a complex system of roads and highways that allowed for the exchange of goods and information between different regions. If the empire had continued to expand, these trade networks would have become even more important. The development of successful trade networks would have allowed the empire to build strong economic ties with neighboring regions and create a sense of unity among the diverse population.

In addition, the Incan Empire would have needed to continue to strengthen its social and political hierarchies. The empire was divided into different social classes, with the ruling elite at the top and the common people at the bottom. If the empire had continued to expand, it is likely that the

social and political hierarchies would have become more complex. This would have required strong leadership and effective governance to maintain stability.

Despite these challenges, it is possible that the Incan Empire could have successfully prevented the Spanish invasion. If the empire had continued to expand and strengthen its society, it is possible that it could have developed into a powerful and prosperous civilization, rivaling the European powers of the time.
