Gupta Empire response

1. Indians were considered masters of metal especially iron and they got this reputation from a technique called forge welding.
2. Gupta scientists were the first ones to prove the geocentric theory which is that the earth revolves around the sun.
3. Gupta scientists were able to closely approximate the circumference difference of the earth from the sun.
4. Gupta kings encouraged the growth of culture, drama and literature after defeating the huns which I was also not aware the gupta kings had done.
