“The Gupta Empire”

1. The inscription on it dates to about 400 AD centuries before the Chinese developed their iron technology 1500 years nearly before the industrial revolution. If Chinese are considered to be the masters of ceramic, Indians were the masters of metal.
2. The technology called Forge welding. Based on the inscription and the analysis of the Gupta gold coins, which is notable on the pillar, we can know that it was commissioned by one Chandra, and this Chandra should be Chandragupta Vikramaditya.
3. Based on their creation, we can see that the people were focused on high quality and that was a time when Indian civilization actually takes a next major leap.
4. Gupta scientists pioneered the use of 0 and the foundation of all modern mathematics. One of the astronomers in around 500 AD proved the earth went around the sun, who came up with the concept of pi.
