FILM RESPONSE: THE GUPTA EMPIRE

The people of the Gupta Empire were very hardworking, rich, prosperous, and handled life with care. Their cities and towns were very beautiful and the climate temperate is very nice. The people were so focused on high quality. One take away I got from time during the Gupta Empire was their extraordinary artistic productions of Gupta civilization. They had golden coins for the kings that held a golden bow of Rama. They also had beautiful sculptures representing all religions. Secondly, the king governs without capital punishment and the people do not kill any living creature. In addition, Indians are the masters of metal. The Master was iron, and it was made by a technique known as Forge welding. Indians took lumps of iron and placed in one on top of the other and hit it with a hammer under hot conditions. This allowed the pillar to be constructed into 6,000 kilograms of weight. The people of the Gupta Empire were great in literature, but they excelled in science and were brilliant in mathematics. Aryabum proved the earth went around sun. He also came up with the concept of pi that significantly impacted the world. He was also successful in philosophy. Lastly, the gods of India are subject to cycles of cosmic destruction over eons of time and human light is a pool of light in infinite darkness.
